

Modator Modules

Quick Start Guide

Installing and Viewing Module Info.

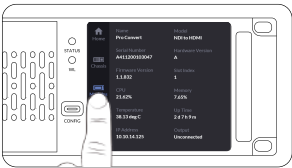

1. Unscrew the screws on the blank panel of the Modator Chasis and remove the blank panel.
2. Horizontally push the module into the slot's guide rail until the module's panel is snug against the chassis, then tighten the screws.

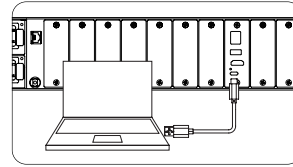

3. Connect cables based on the module model.
4. Tap  on the touchscreen and select your module based on the slot index, to view module information. It's strongly recommended to change the password after the first login.

Using Web UI

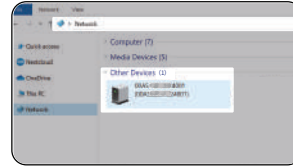

Via Ethernet IP Address

1. Tap  on touchscreen.
2. Select your module based on the slot index and then view the IP address.
3. Type the IP Address in your browser on the computer in the same local network.
4. Log in with the default username and password (both Admin). It's strongly recommended to change the password after the first login.

Via USB NET

1. Connect the CONFIG port on your module to your computer using a USB cable.
2. Type the USB NET IP address 192.168.66.1 in your web browser.
3. Log in with the default username and password (both Admin). It's strongly recommended to change the password after the first login.

Via Windows File Explorer

1. For Windows 7/8/8.1/10/11 users, you can find your Modator Module in the Network > Other Device section of the File Explorer on your computer in the same local network.
2. Double click the device icon to open the Web UI.
3. Log in with the default username and password (both Admin). It's strongly recommended to change the password after the first login.
